

# Boot Sequence Order

---

1. BIOS executes MBR (Master Boot Record).
2. MBR executes GRUB2.
3. GRUB2 loads the kernel.
4. The kernel executes systemd which initialize the system.

## Security Checklist:

1. Physical Security (Kensington lock etc).
2. Set up a BIOS password.
3. Configure the system to boot automatically from the Linux partition.
4. Set up a password for GRUB.
